

Hampton School District – SAU90 Goals 2011 – 2012

Goal #1 – To achieve 100% student proficiency as measured by the NECAP (New England Common Assessment Program) and NWEA (Northeast Educational Assessment) standardized tests in the core subject areas.

- Create a 5-year curriculum review of academics and programs of study
- Ensure access and integration of technology to expand learning
- Provide high quality professional development opportunities that focus on evidence-based practices that support instruction in core academics and integrated arts
- Develop a plan to ensure all students have access to high quality instruction and programming

Goal #2 – To promote collaborative and cooperative communication with all district stakeholders including parents, students, staff, and community.

- Complete HSD SAU Policy Manual; review and update as needed
- Conduct survey to gather data regarding students' and parents' thoughts
- Explore use of the student My Voice Survey as well as the teacher survey
- Develop a consistent and systematic plan to address the requirements under Section 504 of the Rehabilitation Act
- Communicate the mission of the district
- Provide opportunities for parent/family engagement
- Support all functions and personnel of SAU 90 in order to achieve a successful transition from SAU 21

Goal #3 – To create a 5-year Capital Improvement Plan.

- Develop a comprehensive facilities maintenance plan
- Achieve GASB 34 compliance with tracking of all capital assets
- Assess the status and needs of the Hampton Academy facility

Goal #4 – To align financial resources with desired academic outcomes.

- Complete development of the first SAU 90 budget
- Successfully negotiate contracts with SEA and SESA
- Review and analyze existing district contracts to identify cost savings and efficiencies
- Seek alternative funding sources through competitive grants
- Review and analyze the delivery of the district food services program

Goal #5 – To ensure that the district's schools are safe and secure learning environments.

- Evaluate and communicate the current evacuation plans for the Hampton schools
- Conduct a comprehensive review of the Seabrook Nuclear Power Plant evacuation drill for the schools
- Assess all safety factors in each school building
