

**HAZARDOUS MATERIALS DISPOSAL/REMOVAL**

1. There must be appropriate notification to the public 10 days prior to, and during, any hazardous waste/material abatement. This will include:
  - a. Written notice sent home to all parents of children within the school district and to all educators, administrators, and other employees therein.
  - b. Written notice in the local newspapers and the local cable-programming channel.
  - c. Notice posted at all building entrances throughout the entire abatement process.
2. When at all possible, all hazardous waste/material abatements shall be scheduled when school is out for the summer, thereby allowing for an extended vacancy and enhanced safety.
3. At no time shall hazardous waste/material abatement occur when personnel may return to our schools within less than one week (7 days) after the completion of an abatement activity unless approved by the School Board.
